### DEXA - BONE DENSITOMETRY LUMBAR SPINE AND HIP

Report Complete  
Status:

Result 10/2/2013 2:08:00PM PRUITT FNP, MOLLY C  
Annotations: Bone density has improved from previous test.  
Lumbar spine with osteopenia (improved from osteoporosis)  
Hip normal.  
Recommend continue vit D as directed and calcium 1000 mg daily.

DEXA - BONE DENSITOMETRY EXTREMITY

Report Complete  
Status:

Result 7/26/2012 3:36:00PM BARTOLOMEO NP, ELIZABETH E  
Annotations: bone density has decreased since last exam and is now showing osteoporosis. Plz schdule apt with dr. vu to discuss tx options and to review results.

Result 7/27/2012 9:43:00AM DURAN, JOSE  
Annotations: pt was notified and informed scheduled for 08-02-2012 with Dr. VU.

\*\*\*Final Report\*\*\*

IMPRESSION: 1. Lumbar spine BMD WHO classification is now classified as osteoporosis, T-score -2.5, previously -2.1. There has been a statistically significant reduction of quantitative bone mineral density assessment of 6.6%, compared to baseline study of 06/23/2010.  
2. Femoral neck BMD WHO classification is again at the low normal range, no significant quantitative bone mineral density change.  
3. Total hip BMD WHO classification is again at the low normal range, T-score -1.0, with no significant change in quantitative bone mineral density since the study of 06/23/2010.
