MEDICAL IMAGING CONSULTATION

PATIENT: Mclean, Jean R
MRN: P9126571
DOB: 22/Feb/1939
GENDER: Female

ENCTR NUMBER: 7454598
ENCTR TYPE: Outpatient
ADMIT DATE: 23/Mar/2016
DISCHARGE DATE:

ORDERING PROVIDER: Dresselhuis, Jeffrey Franklin Timothy
ADDITIONAL COPIES TO:

PHN: 9050849346

PROCEDURE	ACCESSION	EXAM DATE/TIME	PATIENT AGE AT EXAM
BD Single Site	105-BD-16-00513	23/Mar/2016 10:24	77 years

Reason For Exam

(BD Single Site) ***PREV BD APRIL 2013*** MORE THAN 3 YEARS SINCE PRIOR BD EXAM.

Report

EXAM TYPE:
Bone Mineral Densitometry

HISTORY:

77-year-old female, follow-up BMD. Strontium treatment.

COMPARISON:

April 15th, 2008, April 29, 2010, April 30th, 2013.

FINDINGS:

Lumbar spine levels: L1-L4 BMD = 1.030g.cm²; T-score= -0.2; Z-score= 2.4

Total Proximal Femur: Site Left BMD = 0.903g.cm²; T-score= -0.3; Z-score= +1.6

Femoral neck: Site Left BMD = 0.713g.cm²; T-score= -1.2; Z-score= +1.0

LIMITATIONS: None.

CHANGE (a): In comparison to the most recent prior of April 2013, there has been a significant increase in mineralization of both of the lumbar spine and left hip amounting to some 8% in the spine and some 6% in the hip. As before, interpretation of this change is limited because the patient is taking Strontium which is deposited in bone and has a higher atomic number and may artifactually increased the measured bone
