D.I.S. Women and Advanced Imaging

Patient Name: LINDA S SMITH
Referring Physician: Nobles Bennie
Account #: 1086360
Date of Birth: 11/15/1948
Date of Service: 4/5/2013

Patient ID: 431649
Phone: (504) 466-4276
Page: 1 of 1

BONE DENSITOMETRY (DXA SCAN)

Clinical history: 64 year old female presenting for bone densitometry.
Comparison studies: None.

For the lumbar spine, total bone mineral density is 0.2 gm/cm2 (T score -3.0 and Z score -1.3).

For the left hip, total bone mineral density is 0.78 gm/cm2 (T score -1.3 and Z score -0.1).

Based on criteria established by The World Health Organization, this indicates osteoporosis with high increased risk of fracture (BMD 2.5 SD or greater below the young adult mean).

TEN YEAR FRACTURE RISK (FRAX)

FRAX not reported because some T score is at or below -2.5.
