

Algae Cal, Inc,

2/12/10

After taking both Algae Cal Plus and Strontium for one year I was re scanned (DEXASCAN). The scan showed improvement of 7.4%. Besides improvement of my hip, I am pain free! I am now able to enjoy playing with / picking up grand kids, yard work & exercise. \* This past weekend - I actually joined my family & friends in a bounce house at my grand daughters 2nd Birthday party. It was

awesome - I felt like  
a teenager again!

Thank you for  
introducing these  
wonderful products  
to me. Your staff  
is highly knowledgeable  
and helpful.

Sincerely,  
S. Madhane  
(age 61)

Dexa scan Results:

3/25/14 LT hip osteoporosis <sup>minus</sup> - 2.5

3/31/15 LT hip osteopenia <sup>minus</sup> - 2.3

**EXAM: DEXA; AXIAL SKELETON**

**CLINICAL INFORMATION:** Osteoporosis/osteopenia evaluation.

**TECHNIQUE/INTERPRETATION:**

Bone density evaluation was performed using Hologic Discovery C.

This study was performed at level of the left hip and lumbar spine.

The T score of the left hip is -2.5 which is consistent with osteoporosis.

The T score of the lumbar spine is -2.4 which is consistent with severe osteopenia.

The patient is at high risk for fracture.

There is minimal improvement of the osteoporosis at level of the left hip when compared to prior study dated 02/09/2010. The prior T score was -2.6.

There is worsening of the osteopenia at level of the lumbar spine when compared to prior study. The prior T score was -2.1.

**IMPRESSION:**

1. OSTEOPOROSIS.
2. THE PATIENT IS AT HIGH RISK FOR FRACTURE.
3. THIS STUDY WAS CORRELATED TO THE PRIOR EXAMINATION DATED 02/09/2010.
